

\$LART

Legendary Art

A BLOCKCHAIN-BASED ART RESTORATION INITIATIVE

BRO, WHERE'S THE CAR?

2010. Art Basel Miami.

A famous EV brand entrusted a Roadster to a legend of digital art.

And then... the car vanished.

The world saw it. Photos exist. Records exist.

But now? It's gone.

Not in Elon's garage. Not in a SpaceX warehouse. Not in a museum.

❑ **MISSING.**

WE ARE COMMITTED TO SOLVING THIS MYSTERY.

PROJECT OVERVIEW

\$LART is a Digital Art Restoration Protocol.

This is not a meme coin with an art theme. It is a serious art restoration project that utilizes blockchain technology and community intelligence to solve a real-world mystery.

Our mission is to locate, document, and digitally restore the "Lost Tesla Roadster Art Car" that disappeared after the 2010 Art Basel Miami exhibition.

ULTIMATE GOAL: To secure an official acknowledgment and response from Elon Musk regarding the fate of this lost masterpiece.

THE HISTORICAL RECORD

This project is built on verifiable historical facts, not fiction.

VERIFIED TIMELINE (2010)

- **COMMISSION:** An EV BRAND officially commissioned digital art pioneer Laurence Gartel to

create a custom art car.

- **EXHIBITION:** The psychedelic-wrapped Roadster was publicly unveiled at Art Basel Miami Beach in December 2010.
- **EVIDENCE:** Multiple high-resolution photographs and press coverage from the event exist in archives.
- **ARCHIVE:** The British Library web archives contain records of the initial press releases and coverage.
